# OUR AIM

*Based on client feedback.*

---

I would be delighted to work with your GCSE & A level Maths students. This will be an opportunity for your students to receive unrivalled after school support from a team dedicated to ensuring their success. They will experience an engaging environment where they will cover course curriculum in an engaging and interactive online classroom environment. Your students will get to

- learn meaningfully,
- ask questions,
- get their homework hand marked with feedback,
- get access to fantastic content,
- receive 24/7 support and
- significantly boost their chances of getting an **A grade**.
- either 5 lessons per week or an hour or two after school, whichever suits them best.

At Air Maths Tuition Limited, we are an online tuition service that provides daily after school group tutoring support for all GCSE & A Level Mathematics students.

**Our approach has consistently produced results over the last 10 years**

# MY BACKGROUND

---

I am an experienced Mathematics Tutor with a **First Class Honours degree in Mathematics.**

I currently work with the top UK tutoring agencies providing private and online group tuition to GCSE & A-Level students.

My key achievements and accreditations

- First class honours Mathematics graduate
- 10 years' experience teaching GCSE & A-level Mathematics
- Work with the top tutoring organisations in the UK
- Certificate in online safety accredited by the CPD and pastoral work with underprivileged students.
- Genuine and proud portfolio of over 200 testimonials (will provide upon request)
- Former Scottish boxing champion and British Finalist at University level
- I worked in the financial markets in the city of London as a successful mutli-asset Trader.

# TUTORING STYLE

*With 10 Years Experience*

---

My style of tutoring has been highly praised by both students and parents, and the successes achieved by my students have motivated me to start an online tutoring company of my own which I launched in September 2019.

I believe in communication, change and technology and feel that there are more efficient and dynamic ways to make student's engage and perform.

## Drivers & motivations

Fortunately, I have tutored 100's of students all over the world, which taught me about students of various backgrounds and academic levels.

In my experience, I have seen similar patterns and behaviours in the way that students digest information and engage with learning.

There are 2 things that have stood out most to me in recent years:

1. Students **lack confidence and belief in their textbook** as an adequate revision tool to tackle questions.
2. There is a clear gap in market for **more course spec focused revision**.

With the new specification, which was introduced in 2017, I feel it's vital that we as tutors and teachers can adapt and develop expert methodologies to teach this linear program effectively.

I focus on finding solutions to these challenges.

# RESOURCES

As part of the service, I offer free academic content to your students. I enjoy creating resources for students. This has mainly been inspired by my previous students who felt their textbook examples weren't giving them the sufficient tools to answer exam questions. With all resources I create, the key factors I pay close attention to are:

- New specification course curriculum and examinations prerequisites
- Exam techniques and keywords
- Student common errors
- Examiners reports
- Potential Nuances

My focus is on giving students the right exposure they need to answer a wide array of questions. I also try to find parallels between different topics, which makes for a more cohesive structure and gives students a better understanding. These are the reasons why I feel my resources are highly valued by students.

Please find an example of a [manuscript here](#)

This is the type of content we will be providing to your students.

We are also very proud of our affiliation with [ExamSolutions](#) and [School Entrance Tests](#)

# HOW IT WORKS

Your students will be part of an inspiring digital classroom which consists of a maximum of 30 students.

They will get to improve their understanding of maths and collaborate ideas day by day in this vital period of their academic journey. We are completely focused on success and we use an extremely structured approach to organise and plan lessons.

At the same time our approach is flexible enough to provide your students with the choices they need.

We have built our very own learning management system, called 'Student dashboards' where your students will gain access to

- previous video sessions (if they miss a lesson),
- weekly lesson notes and
- homework.

Please **sign up (free)** for more information on how classes work and how to use our Student dashboard. Should we work together, we are willing to make our lessons shadow the order of lessons in your school and would like to work closely with your Maths Department to achieve the same goals.

**All our school packages are negotiable**

# WHAT WE OFFER

---

- **Expert tutoring** - specialising in the new linear model. I provide tuition of the highest quality and give my students an edge with regards to exam techniques.
- **Complete online support** - Everything from teaching to homework is done online which provides ample convenience and we have seen that our efficiency is improving student's engagement.
- **Structured Lessons** - We work extremely hard to make computers work for us. We are organised and have scheduled and planned every lesson from September all the way up until the end of summer term.
- **Online safety** - We have built-in safeguarding measures in place to ensure student data protection and that all students work in a safe environment. (Please refer to '**Online safety**' and '**Procedures**').
- **Secure and tested system** - with stable ethernet connection, high definition audibility, using a leading web-based conferencing platform called Zoom as our teaching platform.
- **Attendance reports** - we have built-in tracking systems and so can provide you with daily reports on attendance and even your students engagement with the lesson.
- **Full transparency** - We are a completely transparent organisation and are willing to disclose any information about our policy, procedures and all interactions with your students at your request.
- **Fully negotiable and flexible packages** to meet your pupils' needs

# COMPETITORS

---

Like many other companies, Air Maths Tuition is not a pre-programmed service where a computer teaches your students a course. We strongly believe in technology, but human communication is just as important, and we have been able to create a very strong hybrid model for our niche (GCSE & A level Maths). This means that we can continually adapt our teaching styles, and at times 'teach on the fly' to meet the needs of our students while achieving this in a completely digital space at the same time. I believe that this is the inevitable path that education is heading towards.

## My Exclusive offer to you

---

Our approach is unique, and we understand that you may want to test it.

We are willing to prove to you how effective this online academy is by exclusively **offering your students a one week's free trial**. This will give your students time to test the system, experience our lessons and decide whether or not it's the right option for them. I am also more than willing to meet with the students so they can get the chance to know me and I can learn more about their academic needs. All our school packages are negotiable.

Thanks for your attention and I look forward to hearing from you.
