

Do you need more sheltered outdoor space?

Would you like a new covered area for your pupils to learn, play and dine in?

Our stylish, durable and permanent shelters provide the perfect solution at a fraction of the cost of conventional buildings.

- Transform your unused space and provide an alternative break time meal service.
- For a fraction of the cost of a conventional building why not use that idle space?
- Freedom to expand and adapt as needs change.
- Use Aquila to manage the whole project.
- Contact us anytime to arrange a free site visit.
- 4-6 weeks lead time, 1-4 days installation.
- Construction without disruption in and out of term by our DBS checked employees.
- Easily maintained.
- Own a durable shelter with a guaranteed resale value.

Shelters for every year group

18m x 4.5m St Gabriel's Pre-School, Newbury.

6m x 6m Bede Community Primary, Gateshead.

18m x 6m St Joseph's RC High School, Bolton.

Early Years
Classroom canopies for freeflow

KS1-2
Shade covers and outdoor learning areas

KS3-4
Outdoor dining for "food on the go"

"Grab & Go" covered dining areas

The growing trend of schools choosing to provide a more flexible meal service across all times of the day through cashless catering and kiosk outlets reduces the pressure on indoor areas and alleviates difficulties with rotating multiple sittings indoors.

The "Panini effect" is extremely popular with the mobile generation of pupils who have developed a preference for food on the go, staple favourites, sharing and socialising.

This type of service is more effective when provided with a covered queuing and seating area.

To complement the launch of new "Grab & Go" food services at the beginning of the 2019/20 school year Aquila installed two large seating shelters at Wollaton Bluecoat Academy, Nottingham and Bexhill Academy, East Sussex.

These canopies provide weather protection for pupils upon leaving the school building and while queuing at kiosks.

Creating a large covered seating area also ensures this type of service can be contained to a specific area.

17m x 13m Bexhill Academy, East Sussex.

Affordably expand and create quality outdoor space

A return on investment solution with a lifespan of 10 to 20 years and resale value up to 10 years after installation.

We optimise the use of your space with our modular system.

You can begin with a single shelter and enlarge, adapt and restyle the system as your needs dictate.

You can add units, mix roof profiles, change colours and even encompass natural features such as trees, streams, rock outcrops or sloping sites within the scheme to add further interest.

For example, start with a square, enlarge it, stretch it, turn a corner (and another) or wrap it around a tree and so on...

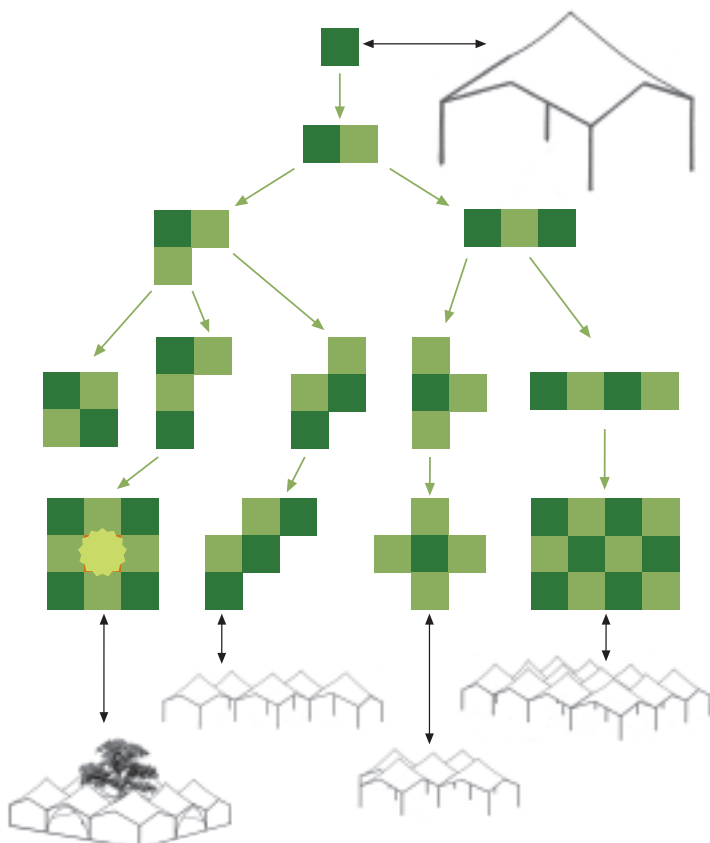

Before

18m x 6m with raised deck, Blessed Robert Sutton Sports College, Burton

Quality UK manufacturing

- Fully manufactured in the UK to exacting standards of workmanship with a 10-year warranty
- 2-pack etched powder coated alloy frame in any colour
- Architectural PVC coated polyester fabric (590 grams) in a choice of 40 colours
- High tensile and tear strengths
- Colour fast
- UV stable
- Finished both sides - easily cleaned
- Fully flame retardant to BS 7837
- Wind performance - 64 mph (force 10)
- Snow loading - 30kg per square metre (30cm of snow)
- The roof frame will support 1 tonne which is ample for additional light and heating should it be required.
- Integrated rain water drainage system
- Maintenance of the canopies is very easy and we recommend a hose down using a low-pressure hose and mild detergent once a year

Wall panels are also available as an option. These can be fitted easily when required to create an outdoor all-weather area and when not in use folded and stowed away in a cupboard.

Through the Twenties and beyond...

Our unique structure was designed by Buro Happold (responsible for The Emirates Stadium, Eden Project, Globe Theatre and O2 Arena) over four decades ago.

Our shelters will withstand anything the Great British weather can throw at it, ensuring yours will last through the next decade at the very least!

“Using Aquila for our new covered decking area proved to be an excellent decision from the outset. They were very attentive to all of our needs and requirements from the outset and we really appreciated the fact that they also made a lot of helpful suggestions based on our original ideas which ended up producing a finished product that was perfect for our requirements. The team were always very good at keeping in touch with us throughout the whole process from conception to completion. I have been very happy and confident in recommending Aquila to a number of my Headteacher colleagues in other schools.”

Mr Martin Cain, Headteacher, Blessed Robert Sutton Catholic Sports College.
